

IT Asset Management

Get Rid of Hard-to-Manage Spreadsheets

Manage All of Your Assets Through a Single Platform

Gain deeper insight into your organization’s assets across their lifecycles. ChangeGear’s advanced Asset Management capabilities gives you the ability to manage valuable resources, such as IT hardware, fleet vehicles, mobile devices, and more. Track attributes of non-technical assets with ease, and know important things about them like depreciated value, warranty status, and location. With our proven track record of success across industries, the SunView team is here to give you a winning Asset Management Strategy.

Support Strong IT Controls and Improve Visibility of Assets

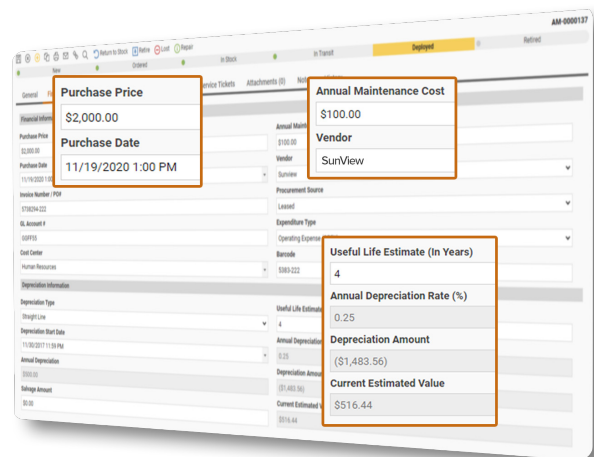

Know where your assets are, what they’re worth, and who’s using them with ChangeGear’s Asset Management.

- Accurately plan and budget for hardware refresh cycles by tracking the age of assets.
- Know ‘problem’ assets by having them linked to incident and service tickets.
- Avoid rework and ‘walking around to count’ assets with a single, standard system.
- Import from spreadsheets, ‘ad hoc’ databases, Finance, and other sources to build a single source of truth.

Control Operating Costs

Finance departments experience budget savings by relying on ChangeGear’s Asset Management. Our software will help your Finance department:

- Monitor organizational inventory depreciation in real time.
- Accurately report asset types and counts without having to go through IT.
- Improve asset spend and budgeting by identifying old, costly-to-maintain, and unreliable assets.
- Track assets by department, age, value, etc. through configurable fields.

Achieve Regulatory Compliance

Meet your organization’s compliance benchmarks with ChangeGear’s Asset Management. Our intuitive software will help your Compliance team:

- Access real-time reports and executive dashboards on asset usage.
- Know where an asset is and who’s using it.
- Track equipment inventory levels.
- Follow an asset throughout its lifecycle.

About SunView Software

SunView Software is a leading provider of smart IT Service Management software that helps companies build more responsive IT departments. SunView’s flexible and simple solutions enable companies to better deliver, manage, and monitor IT needs across the enterprise. Created with a visionary future in mind, the consumer-like interface provides users the experience they’ve come to expect in all areas of life. Most importantly, SunView’s Willow AI™ and Machine Learning Platform is helping to create intelligence-driven IT organizations—bringing together the best of human and machine to launch a new era of intelligent IT Service Management.
